**Supply List for:**

**Digital Photography, Printing and Quilting**

This is a workshop for those who want to learn the newest techniques for printing photos and other images onto fabric. We'll begin with pictures of your favorite things – flowers, people, landscapes, animals, sunsets - images that you might want to incorporate into a quilt or fiber art project. Learn the role that scanners, digital cameras, photo software and printers play in the process of creating fabric. I'll demonstrate using Paint Shop Pro software which has some features that make it especially “quilter friendly” but the concepts are similar to those found in Photoshop and other image editing software. Use the latest products to make your fabric images soft, colorful, washable, and lightfast. This is a no-sewing workshop for those who want to make truly unique and personal fabric pieces to incorporate into their quilts.

*Students do not need to bring any computer equipment for this class!*

**For a \$10 kit fee collected at class time, teacher will bring:**

High thread count cotton fabric to print on  
Bubble Jet Set  
Backing sheets for fabric  
Already prepared fabric sheets for printing  
Printer inks  
Digital images for students to choose from  
Informative handouts

**Students bring:**

Ruler, rotary cutter, mat (travel size)  
Note taking supplies  
Smiles and a willingness to learn and have fun
