Supply List for:

A Photo Editing Software Workshop for Quiltmakers

Would you like to use some of those beautiful photographs you have taken in your quilts? Learn to prepare (crop, re-size, sharpen, apply effects, edit) photographs for printing on fabric. Learn the key concepts of image editing software (Paint Shop Pro) to enhance your photos and prepare them for printing on a variety of fabrics. Learn the features that quilters find most useful and most fun! This class is designed to help you develop your understanding, skill and confidence in working with your photographs on the computer. Included is a complete discussion of printing small and very large images on fabric for your quilting or other fiber projects.

If the host site is not supplying computers for you, please bring:

- Laptop computer with Paint Shop Pro Photo XI already loaded. If you don't own this software, a 30 day trial version is available from www.corel.com.
- The power cord for your laptop
- An external mouse (even if you are comfortable with the touch pad on your laptop, you will find a 'real' mouse easier to use in some areas of the software)
- Note taking supplies
- Your smile and willingness to have fun!

Note: If you are borrowing a laptop from someone else for the class, please take a few minutes before you arrive to become familiar with it. Make sure that the screen is comfortable for you. It can be adjusted to make the images and type larger if needed.
